PROFILE

A young Individual who is self-motivated with an ability to put together a well-written code that helps to create advanced applications that are fit for purpose, functionally correct, and meets the company's precise needs. He has a track record of using modern technologies to bring software products to life.

Key strengths include being a fast learner and the ability to take initiatives. Able to use web-based systems that create a highly interactive user experience. On a personal level, he is loaded with energy, passion, and looking forward to joining a company where there is a culture of excellence and teamwork.

EMPLOYMENT HISTORY

- ❖ **Backend Engineer, Software Business Software Consulting (SBSC) Jan 2021 - Present**
 - Worked on the Backend Infrastructure and Architecture of the Lagos State Government Internship Placement Program.
 - Participate in the entire application lifecycle, focusing on coding and debugging.
 - Collaborating with the front-end developers and other team members to establish objectives and design more functional, cohesive codes to enhance the user experience.
 - Involved in the development cycle of a Crypto Currency Platform where we used Laravel as the backend.
- ❖ **Backend Engineer, Traders of Africa (TOFA) Jan 2020 - Present**
 - Built back-end applications using modern technologies like Laravel, Node JS/Express, MySQL.
 - Design and implementation of the 99.99% up-time REST API for the web application, that provided critical connectivity channels for distributed functionality using Node JS/Express and TypeScript.
 - Improved our secondary product with modern technology like NodeJs which has led to an increase in performance, smooth operation and increased flow of revenue by a large percentage.
 - Led the drive to implement modern framework like Laravel and Eloquent on project design, thereby reducing the TTM (time-to-market) by 49% and ensuring high code maintainability.
 - Assisted the Front End team in the consumption of APIs using ReactJS and TypeScript.
 - Continuously identified, measured, and improved processes on our already existing system.
 - Single handedly built an central admin system for monitoring and tracking of transactions using LARAVEL Framework.
- ❖ **Lead Developer, Winapay Limited Mar 2017 – Dec 2019**
 - Involved in every aspect of the application development process, from early design to testing and launch of the product.
 - Conducting split tests related to the high-volume online service resulted in improved content engagement and content shareability by 14%.
 - Integrating with third-party services and external APIs as part of implementing high-profile web application, standardizing user accounts management among different projects, and mitigating code duplicity.

- Enforced redesign of the web application from scratch using LARAVEL, thereby reducing bugs on the web application by 80% and increasing efficiency and code readability
- Helped set up a lot of our unit, ui and build/deploy plans. Also, other process improvement tasks like JIRA transition workflows, slack notification services and Bitbucket/JIRA API services.
- Introduced BitBucket as a collaboration between developers, resulting in increased efficiency and code Maintenance.

❖ **Lead API Developer, Talkgap Mobile Limited.....**

- Bridging communication from the database to android application using REST APIs and third Parties APIs.
- Bridging communication from the database to android application using REST APIs and third Parties APIs

EDUCATION

❖ **BSc. Houdegbe North American University Benin Republic..... Sep 2012 – Jul 2016**
